## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to DNA promoters, classified in class 536, subclass 23.1.
  - II. Claims 11-12, drawn to DNA requiring expression, classified in class 536, subclass 23.1.
  - III. Claims 13-19, drawn to plants and plant cells, classified in class 800, subclass 298.
  - IV. Claims 20 and 21, drawn to a method of expression, classified in class 800, subclass 287.
  - V. Claims 22 and 23 drawn to a method of identification, classified in class 800, subclass 278.
2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, or different effects. The group II DNA's require expression, whereas the group I DNA's not require expression. The plants of Group III, are biological organisms with complex metabolism.

3. Inventions IV and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, or different effects. Group IV is a method of expression and Group V is a method of identification.

4. Inventions I/II/III and IV/V are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product: The methods of IV and V are different methods for the use of I, II, and III products.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the literature search required for each of the Groups are not required for another of the Groups, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1638

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
